

## BIRD FEEDER

### OBJECTIVES

- To attract birds through bird feeders
- To start conversation with our feathered friends
- To be productive and reuse the materials available at home

### MATERIALS REQUIRED

- Used Juice carton
- Strong strings
- Water resistant health friendly paints and brushes
- Small sturdy twigs

### PROCEDURE

- Clean some used juice or milk carton thoroughly.
- Cut out a square part at the front leaving some space below where a twig can be inserted for birds to perch on
- Punch a hole on the top of the carton cover for the string
- Color the carton with attractive designs and fill it with seeds and hang it in a tree or the side of the house, somewhere birds can come and eat the seeds. Your bird feeder is ready!

### THINGS TO REMEMBER

- Where should you put the feeder?  
Birds would probably come to a feeder in which they feel safe and is less noisy
- What food should you put in your feeder?  
Certain foods tend to attract certain birds. Mixed seed, sunflower seed, fresh cut fruits, peanuts is favoured by many species
