

ANIMAL CHARADES

For age group: 2-5

Materials required:

Printed/ drawn pictures (at least 10 animals)

Small box or container-1

Scissors

Estimated time:

10-20 minutes

Objectives:

- Identify animals through actions
- Develop imagination and motor skills

Cut out pictures of at least 10 animals from old magazines and newspaper that kids know and can mimic. You can also opt to draw them.

After completing this task, fold the pictures of the animals into smaller pieces and put them in a container. Begin the game by telling the first person to randomly pick one paper and silently act according to the animal mentioned in the paper. The person acting the animal has to do so until somebody gets the right answer and whoever gets the answer first will then proceed to act out another animal.

You can make more than 10 animals and can also include birds or anything related to nature to make it more fun.
