

# ANIMAL DICE GAME

For age group: 2-5

## Materials required:

- Old cardboard/ paper
- Old magazines/ newspaper
- Glue
- Colors

## Estimated time:

20-30 minutes

## Objective:

Learn actions of various animals

For this game, you can get prints for the dice online. You can also opt to make a new and unique one. First, you need to prepare a list of animals and their actions. Then make outlines for the dice and draw/ write the animal with their distinct action and color them. After writing all the actions, you then cut the outline and stick it with glue. If your child is confused, you can show them videos of the animals and this way they can learn more about them.

To make it more exciting, you can prepare separate dices for animals, birds, insects, sea animals, etc. You can also give points to the animal and their movements to make it a bit difficult and competitive. Then a race can also be held at staircase or a long hallway/corridor with the movements chosen.
