

TOUCH & FEEL

For age group: 6-10

Materials required:

- Shoe box/ cardboard box (medium sized) -1
- Scarf/ eye mask
- Scissors
- Tape
- Old cloth

Estimated time:

10-20 minutes

Objectives:

- To develop sensory motors
- To understand the texture of various objects

This is an exciting game to play with your child. For this game you need various that are readily available in the house. All the items should have different texture and you should have at least 5 items. Don't let your child see the items before the game. Before starting, blindfold your child with a scarf so that he/she doesn't see the item. You can also opt to make a hole in the box or make a covering with cloth so that the item inside won't be revealed. Place the item in the shoebox and tell your child to place his/her inside the box. If they hesitate, you can give a hint. For example, if you put spinach in it, the hint could be it's green.
